MONGODB | MERN | GIT | GITHUB | SQL | DSA | C++ |
JAVA | JAVASCRIPT | AI/ML | PYTHON | REST API's

Dedicated B.Tech Computer Science student with a strong passion for software development and problem-solving. Proficient in C++, data structures, and algorithms, with a keen ability to tackle complex challenges efficiently. Experienced in Full Stack web development, including HTML, CSS, JavaScript, Node.js, and MongoDB for backend development. Skilled in building dynamic and interactive user interfaces using React. Adept at designing scalable solutions and optimizing performance. Constantly learning and exploring new technologies to enhance development expertise.

EDUCATION

BTECH CSE

JIMS Engineering Management Technical
Campus

12/2021 - 07/2025

Greater Noida , Uttar Pradesh, India

Senior Secondary

Guru Harkrishan Public School

04/2019 - 03/2020

New Delhi , Delhi , India

Secondary

D.A.V Public School

04/2016 - 03/2017

PERSONAL PROJECTS

Food Delivery App (07/2024 - 08/2024)

- Developed a MERN stack food delivery app with Node.js, Express.js, and React.js. Implemented secure authentication, modular controllers, and well-structured API routes. Managed database connections efficiently for seamless functionality and payment gateway.

E-commerce Platform for Clothing (MERN Stack)
(01/2024 - 03/2024)

- Built an e-commerce website for men's, women's, and children's clothing using the MERN stack. Designed a responsive UI with React.js and optimized backend with Node.js and Express.js. Integrated secure authentication, payment gateway, and efficient database management.

Blog Application (MERN Stack) (11/2024 - 12/2024)

- Developed a full-stack blog application with React.js, Node.js, Express.js, and MongoDB. Implemented user authentication, rich text editor, and dynamic content management. Ensured seamless CRUD operations with structured API routes.

Chat Application (MERN Stack) (02/2025 - 03/2025)

- Built a real-time chat application using MERN stack with Socket.io for live messaging. Integrated secure user authentication, private/public chat rooms, and message storage. Designed an interactive UI with React.js for smooth user experience.

Expense Tracker (MERN Stack) (01/2025 - 02/2025)

- Created an expense tracker application using MERN stack for managing income and expenses. Integrated user authentication, category-based expense tracking, and real-time data visualization. Ensured efficient database management for secure financial records.

WORK EXPERIENCE

Backend Developer Internship

Sustain Mall Private Limited

05/2022 - 10/2022

Achievements/Tasks

- Worked as a Backend Developer Intern, building RESTful APIs with Node.js, Express.js, and CRUD operations. Integrated database, implemented JWT authentication, ensured validation, and deployed APIs to the cloud.

ACHIEVEMENTS

Member of HASH TAG SOCIETY

As a member of a technical society, I actively engage in collaborative projects, workshops, and events that foster innovation and learning within the tech community.

Participate a Hackathon VIHAN6.0 DTU

Participated in Vihaan 6.0, a prestigious hackathon hosted by Delhi Technological University (DTU), where I collaborated with a diverse team to develop an innovative solution addressing. Our project involved leveraging technologies such as, e.g., Node.js, React, etc. to create a user-friendly application that optimizes public transport routes. Successfully presented our prototype to a panel of industry experts, receiving positive feedback for its functionality and design, which enhanced my skills in teamwork, problem-solving, and rapid prototyping.

CERTIFICATES

Frontend certificates Courses Great Learning (07/2023 - 08/2023)

Mastered web design principles with a focus on responsive layouts and semantic HTML, enhancing user experience through CSS3 techniques. JavaScript Certification Developed a robust understanding of JavaScript fundamentals and ES6 features, enabling dynamic and interactive web applications. React Certification Gained proficiency in building scalable user interfaces with React, emphasizing component-based architecture and state management.

Backend Certificates Courses Great Learning (09/2023 - 11/2023)

Completed a comprehensive program covering MongoDB, Express.js and Node.js, focusing on building full-stack web applications. Developed hands-on projects that emphasized RESTful API design, user authentication, and responsive front-end development.

C++ Programming Certification Infosys Spring Board (12/2022 - 01/2023)

Completed a course covering C++ fundamentals, object-oriented programming principles, and data structures, with practical projects to enhance coding skills.

JAVA Programming Certification Infosys Spring Board (05/2023 - 06/2023)

Acquired a comprehensive understanding of Java, including core concepts, object-oriented programming, and advanced features, supported by hands-on programming assignments

SQL DBMS Courses Great Learning (03/2025 - 04/2025)

Completed a course covering SQL fundamentals, database management concepts, and query optimization techniques, with hands-on projects to enhance database querying skills.
